

CBI-Kolloquium SS 2016

- 28. April 2016** **Neue Energieträger aus der Konfektionierung von Biomassen und Reststoffen**
Prof. Dr. Peter Quicker
RWTH Aachen, Technologie der Energierohstoffe
- 12. Mai 2016** **Nanostructured particles: beyond the trade-off between large-scale production & nano-scale precision**
Dr. Ir. J. Ruud van Ommen
Delft University of Technology
- 23. Juni 2016** **Swimming on a sphere: active matter dynamics on curved manifolds**
Dr. Liesbeth Janssen
University Düsseldorf, Institute for Theoretical Physics II
- 23. Juni 2016** **Designing complex microstructures**
Prof. Dr. Wim Noorduin
FOM Institute AMOLF, NL
- 07. Juli 2016** **Environmental and safety implications of emerging airborne nanoscale pollutants and their emission control**
Prof. Dr. Jing Wang
ETH Zürich, Institute of Environmental Engineering
- 14. Juli 2016** **Euler-Lagrangian modelling and Magnetic Resonance Imaging of Gas-solid systems**
Prof. Christoph Müller
ETH Zürich, Institute of Energy Technology
